

**PUBLIC NOTICE
INTENT TO ADOPT A MITIGATED NEGATIVE DECLARATION
CITY OF SAN JOSÉ, CALIFORNIA**

File No. and Project Name/Description:

File No. HA89-039-01. SuperMicro. A Site Development Permit Amendment to allow for the construction of a 59,626-square-foot addition to an existing 99,623-square-foot warehouse on an approximately 7.4-gross-acre site located on the northerly side of Fox Lane, approximately 600 feet westerly of Old Oakland Road (871 Fox Lane). The project is located in Council District: 4.

California State Law requires the City of San José to conduct environmental review for all pending projects. Environmental review examines the nature and extent of any potentially significant adverse effects on the environment that could occur if a project is approved and implemented. Based on an initial study, the Director of Planning, Building & Code Enforcement has concluded that the project described above will not have a significant effect on the environment. The project location **does not** contain a listed toxic site.

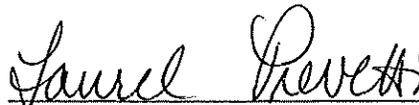

The purpose of this notice is to inform the public of the Director's intent to adopt a Mitigated Negative Declaration for the proposed project on April 26, 2011, and to provide an opportunity for public comments on the draft Mitigated Negative Declaration. The public review period for this draft Mitigated Negative Declaration begins on **April 6, 2011**, and ends on **April 26, 2011**. Adoption of a Negative Declaration does not constitute approval of the proposed project. The decision to approve or deny the project described above will be made separately as required by City Ordinance.

The draft Mitigated Negative Declaration, initial study, and reference documents are available for review under the above file number from 9:00 a.m. to 5:00 p.m. Monday through Friday at the City of San Jose Department of Planning, Building & Code Enforcement, City Hall, 200 East Santa Clara Street, San José CA 95113-1905. The documents are also available at the Dr. Martin Luther King, Jr. Main Library, 150 E. San Fernando St, San José, CA 95112, and online at <http://www.sanjoseca.gov/planning/eir/MND.asp>

For additional information, please call the project manager **Lesley Xavier** at (408) 535-7852.

Joseph Horwedel, Director
Planning, Building and Code Enforcement

Circulated on: April 6, 2011

Deputy

MITIGATED NEGATIVE DECLARATION

The Director of Planning, Building and Code Enforcement has reviewed the proposed project described below to determine whether it could have a significant effect on the environment as a result of project completion. "Significant effect on the environment" means a substantial, or potentially substantial, adverse change in any of the physical conditions within the area affected by the project including land, air, water, minerals, flora, fauna, ambient noise, and objects of historic or aesthetic significance.

NAME OF PROJECT: SUPERMICRO Expansion

PROJECT FILE NUMBER: HA89-039-01

PROJECT DESCRIPTION: A Site Development Permit Amendment to allow for the construction of a 59,626-square-foot addition to an existing 99,623-square-foot warehouse on an approximately 7.4-gross-acre site.

PROJECT LOCATION & ASSESSORS PARCEL NO.: Northerly side of Fox Lane, approximately 600 feet westerly of Old Oakland Road (871 Fox Lane); (APN 237-15-188)

COUNCIL DISTRICT: 4

APPLICANT CONTACT INFORMATION: John Chang, Super Micro Computer, Inc., 980 Rock Avenue, San Jose, CA 95131 (Phone: 408-895-6245)

FINDING

The Director of Planning, Building & Code Enforcement finds the project described above will not have a significant effect on the environment in that the attached initial study identifies one or more potentially significant effects on the environment for which the project applicant, before public release of this draft Mitigated Negative Declaration, has made or agrees to make project revisions that clearly mitigate the effects to a less than significant level.

MITIGATION MEASURES INCLUDED IN THE PROJECT TO REDUCE POTENTIALLY SIGNIFICANT EFFECTS TO A LESS THAN SIGNIFICANT LEVEL

- I. **AESTHETICS** – The project will not have a significant impact on this resource, therefore no mitigation is required.
- II. **AGRICULTURE AND FOREST RESOURCES** – The project will not have a significant impact on this resource, therefore no mitigation is required.

III. AIR QUALITY –

- a. The following Best Management Practices shall be required of construction contracts and specifications for all construction to prevent visible dust emissions from leaving the site.
 - i. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.
 - ii. All haul trucks transporting soil, sand or other loose material off-site shall be covered.
 - iii. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.
 - iv. All vehicle speeds on unpaved roads shall be limited to 15 mph.
 - v. All roadways, driveways and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
 - vi. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by CCR Title 13). Clear signage shall be provided for construction workers at all access points.
 - vii. All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.
 - viii. A publicly-visible sign with the telephone number and person to contact at the Lead Agency regarding dust complaints shall be posted. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.

IV. BIOLOGICAL RESOURCES –

- a. If possible, construction should be scheduled between September and December (inclusive) to avoid the raptor nesting season. If this is not possible, pre-construction surveys for nesting raptors shall be conducted by a qualified biologist to identify active raptor nests that may be disturbed during project implementation. Between January and April (inclusive) pre-construction surveys shall be conducted no more than 14 days prior to the initiation of construction activities or tree relocation or removal. Between May and August (inclusive), pre-construction surveys shall be conducted no more than thirty (30) days prior to the initiation of these activities. The surveying biologist shall inspect all trees in and immediately adjacent to the construction area for raptor nests. If an active raptor nest is found in or close enough to the construction area to be disturbed by these activities, the biologist shall, in consultation with the California Department of Fish and Game, designate a construction-free buffer zone (typically 250 feet) around the nest, which shall be maintained until after the breeding season has ended and/or a qualified biologist has determined that the young birds have fledged. The applicant shall submit a report to the City's Environmental Principal Planner indicating the results of the survey and any

designated buffer zones to the satisfaction of the City's Environmental Principal Planner prior to the issuance of any grading or building permit.

V. CULTURAL RESOURCES –

- a. Pursuant to Section 7050.5 of the Health and Safety Code, and Section 5097.94 of the Public Resources Code of the State of California: In the event of the discovery of human remains during construction, there will be no further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent remains. The Santa Clara County Coroner will be notified by the developer and will make a determination as to whether the remains are Native American. If the Coroner determines that the remains are not subject to his authority, he will notify the Native American Heritage Commission, who will attempt to identify descendants of the deceased Native American. If no satisfactory agreement can be reached as to the disposition of the remains pursuant to this State law, then the landowner will reinter the human remains and items associated with Native American burials on the property in a location not subject to further subsurface disturbance.
- b. Any Native American human remains that are discovered and would be subject to disturbance will be removed and analyzed, a report will be prepared, and the remains will be reburied in consultation and agreement with the Native American Most Likely Descendant designated by the Native American Heritage Commission. Prior to obtaining a Building Permit, a copy of the report will be submitted to the City's Environmental Principal Planner to the satisfaction of the Director of Planning.
- c. A qualified archaeologist shall be required to monitor site clearing and all grading and trenching operations that extend into native soils, as follows:
 - i. If no resources are discovered, the archaeologist shall submit a report to the City's Environmental Principal Planner verifying that the required monitoring occurred and that no further mitigation is necessary.
 - ii. If evidence of any archaeological, cultural, and/or historical deposits is found, hand excavation and/or mechanical excavation shall proceed to evaluate the deposits for determination of significance as defined by CEQA guidelines.
 - iii. The archaeologist shall submit reports, to the satisfaction of the City's Environmental Principal Planner, describing the testing program and subsequent results; these reports shall identify any program mitigation to be completed in order to mitigate archaeological impacts (including resource recovery and/or avoidance, testing and analysis, removal, reburial, and curation of archaeological resources at a recognized storage facility). A final report shall verify completion of the mitigation program to the satisfaction of the City's Environmental Principal Planner.
 - iv. In the event that human remains and/or cultural materials are found, all project-related construction shall cease within a 50-foot radius in order to proceed with the testing and mitigation measures required.

VI. GEOLOGY AND SOILS –

- a. A geotechnical report shall be conducted, submitted and approved prior to issuance of a grading permit to evaluate potential impacts due to liquefaction, expansive soils, seismic shaking, etc.; and mitigation measures, including site grading requirements, utilization of special foundations and control of drainage, shall be developed and implemented as warranted.

VII. GREENHOUSE GAS EMISSIONS– The project will not have a significant impact on this resource, therefore no mitigation is required.

VIII. HAZARDS AND HAZARDOUS MATERIALS –

- a. Prior to issuance of a grading permit, a Soil Management Plan shall be developed to the satisfaction of the Environmental Compliance Officer of the City's Environmental Services Department. The Soil Management Plan shall establish practices for managing and handling buried structures, wells, debris and/or impacted soil if these materials/structures are encountered prior to or during demolition and/or site grading. The measures identified in the Soil Management Plan, including special handling and/or disposal measures, shall be implemented as warranted.
- b. Prior to issuance of a grading permit as part of the Soil Management Plan, soil at the site shall be sampled for long-life pesticides and/or CAM metals. If impacted soil is detected above the respective Total Threshold Level Concentrations (TTLCs) or other California Hazardous Waste criteria, it shall be over-excavated for appropriate offsite disposal at a permitted facility.

IX. HYDROLOGY AND WATER QUALITY – The project will not have a significant impact on this resource, therefore no mitigation is required.

X. LAND USE AND PLANNING – The project will not have a significant impact on this resource, therefore no mitigation is required.

XI. MINERAL RESOURCES – The project will not have a significant impact on this resource, therefore no mitigation is required.

XII. NOISE – The project will not have a significant impact on this resource, therefore no mitigation is required.

XIII. POPULATION AND HOUSING – The project will not have a significant impact on this resource, therefore no mitigation is required.

XIV. PUBLIC SERVICES – The project will not have a significant impact on this resource, therefore no mitigation is required.

XV. RECREATION – The project will not have a significant impact on this resource, therefore no mitigation is required.

XVI. TRANSPORTATION / TRAFFIC – The project will not have a significant impact on this resource, therefore no mitigation is required.

XVII. UTILITIES AND SERVICE SYSTEMS – The project will not have a significant impact on this resource, therefore no mitigation is required.

XVIII. MANDATORY FINDINGS OF SIGNIFICANCE – The project will not substantially reduce the habitat of a fish or wildlife species, be cumulatively considerable, or have a substantial adverse effect on human beings, therefore no mitigation is required.

PUBLIC REVIEW PERIOD

Before 5:00 p.m. on **April 26, 2011**, any person may:

1. Review the Draft Mitigated Negative Declaration (MND) as an informational document only; or
2. Submit written comments regarding the information, analysis, and mitigation measures in the Draft MND. Before the MND is adopted, Planning staff will prepare written responses to any comments, and revise the Draft MND, if necessary, to reflect any concerns raised during the public review period. All written comments will be included as part of the Final MND.
