ANALYSIS AND RECOMMENDATIONS**BACKGROUND**

The applicant, Silicon Valley Habitat for Humanity, Inc., is proposing the following land use approvals on a 0.16 gross acre property located on the southwest corner of Murphy Avenue and Ringwood Avenue:

1. *PDC04-072*. Planned Development rezoning from A Agriculture District to A (PD) Planned Development District to allow up to two (2) single-family detached residential units on individual lots,
2. *PD04-062*. Planned Development Permit to allow the construction of two single-family detached residential units, and
3. *PT04-080*. A Planned Development Tentative Map to subdivide the subject property from one lot into two individual single family lots.

The three applications are being reviewed concurrently under the unified process as set forth in Title 20. Under the unified process, the approval procedure shall utilize that which is equivalent to the highest-level permit or approval. In this case, the highest-level approval would be the Planned Development Rezoning request that requires a recommendation by the Planning Commission and approval by the City Council. The final hearing body shall make the findings, if any, applicable to each permit or approval.

The surrounding neighborhood is developed with single-family detached and attached residential units.

Project Description

The proposed project can be characterized as a two-unit court home development located on a large, infill corner lot. The future lot sizes will consist of one 3,528 square foot lot and one 3,700 square foot lot. Both lots will be accessed from a single driveway via Murphy Avenue. The two residential front yards will be oriented to Ringwood Avenue. Both residences will have four bedrooms with an overall size of approximately 1,543 square feet, which includes the garage/carport. The project will additionally provide two off-street guest parking spaces for visitors. The proposed project will provide ownership housing to the low to very low-income families at no profit and no interest to the developer.

GENERAL PLAN CONFORMANCE

The proposed project to develop up to two (2) single family residential units on one 3,528 square foot lot and one 3,700 square foot lot resulting in a net density of 12.5 DU/AC, and is consistent with the site's San Jose 2020 General Plan Land Use /Transportation Diagram designation of Medium Density Residential (8-16 DU/AC).

ENVIRONMENTAL REVIEW

Under the provisions of Section 15303(a) of the State Guidelines for Implementation of the California Environmental Quality Act (CEQA) this project is found to be exempt in that Class 3 consists of the construction and location of limited numbers of new, small facilities or structures; installation of small new equipment and facilities in small structures; and the conversion of existing small structures from one use to another where only minor modifications are made in the exterior of the structure.

The proposed project is consistent with this category in that the project will allow the construction of two single-family residences in an already urbanized area.

ANALYSIS

The action before the Planning Commission is to make a recommendation to the City Council on all three of the proposed application requests simultaneously. The analysis section of this report addresses the key issues; neighborhood compatibility, site design, and architecture.

Planned Development Zoning and Permit

Neighborhood Compatibility

The proposed project site is located within an already established residential neighborhood developed with a mix of single-family and two-family attached and detached residences. The surrounding developments have an average lot size of 3,000 square feet and are attached units. The proposed project is designed to reflect a lot pattern consistent with the existing development in the area and would result in the development of two-story single-family residences compatible with the surrounding uses. The proposal required a Planned Development Zoning in that the minimum lot size proposed of 3,528 square feet is smaller than the minimum allowed under a traditional R-1-8 Residence Zoning District.

Site Design

The proposed detached single-family residential project proposes below market-rate houses on lots similar to the pattern in the existing neighborhood. This site is adjacent to the rear and side yards of existing single-family attached residences. For this reason, the project has been designed to include setbacks consistent with or greater than the existing setbacks in the surrounding neighborhood. The project conforms to the Residential Design Guidelines with respect to all other relevant development standards for this housing type in terms of internal setbacks, separations, open space and parking.

Architecture

The project proposes residential-scale architecture that incorporates elements such as attached garages/carports setback from pedestrian oriented front porches/entryways. The proposed architecture is compatible with the established surrounding single-family attached and detached neighborhood.

Tentative Map

The Tentative Map includes approval of the overall configuration of lot lines, easements, and issues associated with property access for the site. The applicant is requesting a Tentative Map to allow the subdivision of one lot into two parcels on a 0.16 gross acre site. All proposed parcels will have common access from a public right-of-way or street and is consistent with the Planned Development Zoning for the subject project.

PUBLIC OUTREACH

Notices of the public hearing were distributed to the owners and tenants of all properties located within 1000 feet of the subject site as well as published in the San José Post Record. The Planning Commission agenda and City Council agenda are posted on the City of San José website with copies of the staff report and City Council memo. Staff has been available to discuss the project with interested members of the public.

RECOMMENDATION

Planning staff recommends that the Planning Commission forward a recommendation to the City Council to approve the subject Planned Development Rezoning, Planned Development Permit and Tentative Map Permit for the following reasons:

1. The project conforms to the General Plan Land Use/Transportation Diagram designation of Medium Density Residential (8-16 DU/AC).
2. The proposed project will be compatible with the surrounding neighborhood.
3. The project furthers the objectives the City's infill development policies.
4. The project conforms to the Residential Design Guidelines.
