# PARKING ANALYSIS INFORMATION & INSTRUCTIONS

A parking analysis is required to obtain Building or Planning Permits when there are tenancy changes related to a change in use, building additions or new building developments. For further explanation, please review our Parking Analysis brochure at [www.sanjoseca.gov/planning](http://www.sanjoseca.gov/planning).

**An appointment is required to submit the Parking Analysis application package for review. To schedule an appointment, please call (408) 535-3555. The attached forms must be filled out and signed by property owner/manager/leasing agent, for Planning staff to review at time of submittal. Also, provide two (2) copies of a site plan, drawn to scale, showing all property lines, the location of the businesses and notes use of each tenant space, their gross square footages, and parking lot layout with the number of spaces labeled (see sample site plan). If the property consists of multiple parcels and the parking is shard across those properties you must provide a copy of the recorded Covenant of Easement or Title Report. Building permits will not be issued unless documentation clearly shows sufficient parking is available on site for all uses, existing and proposed.**

Every use, including a change or expansion of a use, shall provide, on site, the required off- street parking in compliance with the provisions of the Parking & Loading Chapter (20.90) of the City of San Jose Municipal Code, which can be viewed at [www.sanjoseca.gov/planning](http://www.sanjoseca.gov/planning). If the number of off-street parking spaces required contains a fraction, the number shall be rounded to the nearest higher whole number. When two or more uses are located in the same lot or parcel of land or within the same building, the number of off-street parking spaces required shall be the **total sum** of the requirements of the various individual uses computed separately.

The parking analysis must list all tenants on the lot, and included the address, use, and square footage of each tenant. Vacant spaces must also be listed and parking requirements based on the most intense use. If any tenants are public eating establishments (i.e., restaurants, coffee shops), then the dining square footage **and** number of seats must be listed. Each tenant must have calculated the number of parking spaces required for its use. If the total number of parking spaces that is required for all the tenants exceeds the number of parking spaces provided on the site, then Building Permits will not be issued for the new tenant.

**"Floor area"** means eighty-five percent of the "total gross floor area" of the building.

**"Total gross floor area"** means the sum of the gross areas of all floors of the building, (including floors below as well as above ground), confined within the interior faces of the exterior walls of the building.

### Common Parking Ratios:

Use	Minimum Parking Required
Health club, gymnasium	1 per 80 sq. ft. recreational space
Public eating establishments	1 per 2.5 seats or 1 per 40 sq. ft. of dining area, whichever is greater
Take-out only establishments	1 per 75 sq. ft. of area open to the public, minimum of 5 spaces
Retail sales, goods	1 per 200 sq. ft.
Personal Services	1 per 200 sq. ft.
Medical, dental office	1 per 250 sq. ft.
Business office	1 per 250 sq. ft.
Instructional Studio	1 per 150 sq. ft.

No structure constructed, or use instituted, prior to November 10, 1965 shall be required to meet the off-street parking requirements of this Title unless there is a substantial change in the structure or in the use of the structure or land. [Substantial change: (a) the number of parking spaces required under current Code for the structure or use, as it existed on November 10, 1965, and (b) the number of parking spaces required under the current Code for the proposed structure or use. [**b - a = c, if c/b > 15%**]

**PLEASE CALL THE APPOINTMENT DESK AT (408) 535-3555 FOR AN APPLICATION APPOINTMENT.  
THIS APPLICATION APPOINTMENT IS LOCATED ON THE 2ND FLOOR OF CITY HALL.**

## OFF-STREET PARKING DESIGN STANDARDS

**Note: Please refer to the Zoning Ordinance (Title 20 of the City of San Jose Municipal Code) for a complete set of parking-related provisions. This handout is intended to provide ONLY summary information related to off-street parking design.**

Title 20 of the San Jose Municipal Code, the Zoning Code, includes provisions that regulate the design and mix of off-street parking stalls. Included in this handout are those provisions related to off-street parking design, as well as illustrations of the various design criteria related to parking stalls and circulation aisles.

### **20.90.100 Design Standards**

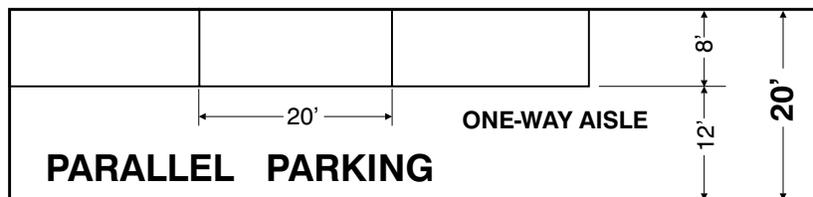

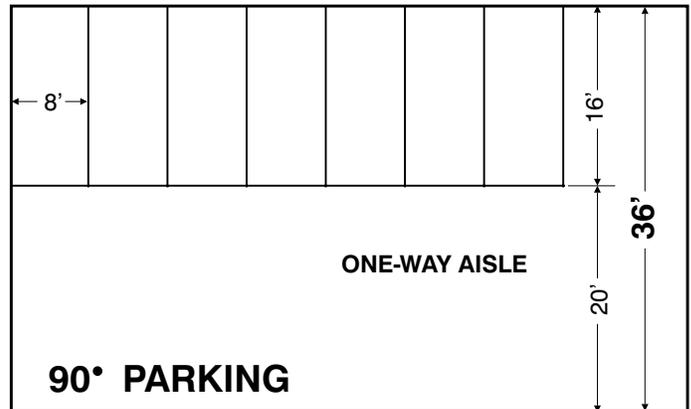

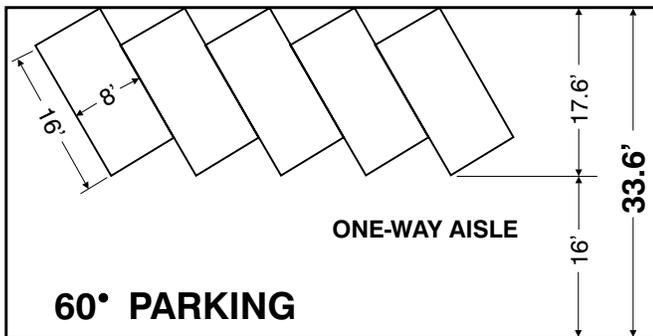

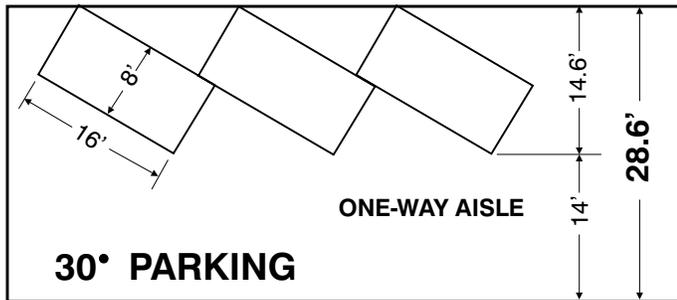

- A. All off-street parking spaces shall conform to the design requirements set forth in Table 20-220.
- B. Off-street parking spaces for small cars shall be marked as such.
- C. Notwithstanding the provisions of this Section, the approving person or body pursuant to the provisions of this Title may allow reduction of the minimum width of certain twenty-six (26) foot aisles on a site to not less than twenty (20) feet, provided such reduction will not impair the safe and convenient accessibility of the parking spaces affected thereby, and the safety of the site, as otherwise provided in this Section.

### **20.90.060 (A) & (B)-- Number of Parking Spaces Required**

- A. Each land use shall provide, on site, at least the minimum number of parking spaces required by Table 20-190, unless a modification has been granted pursuant to Section 20.90.220 or 20.90.230.
- B. All parking spaces shall be standard size spaces as set forth in Section 20.90.100. Alternatively, a **Development Permit** may:
  - 1. Authorize all off-street parking spaces to be uniform-size car spaces, as set forth in Section 20.90.100; or
  - 2. Allow up to forty (40) percent of the off-street parking spaces to be small car spaces as set forth in Section 20.90.100. The remainder of the required off-street parking spaces shall be standard car space as defined in Section 20.100.

## OFF-STREET PARKING DESIGN STANDARDS FOR **COMPACT CAR SPACES**

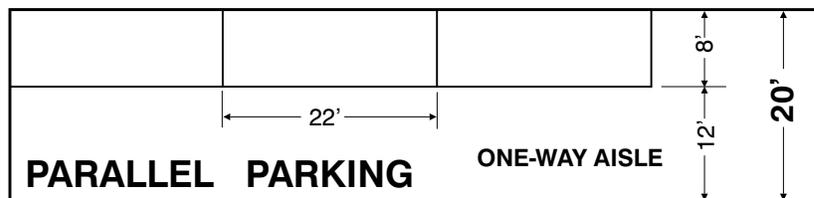

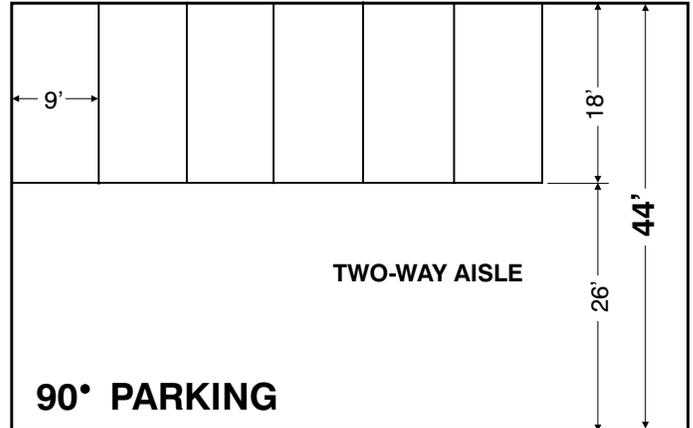

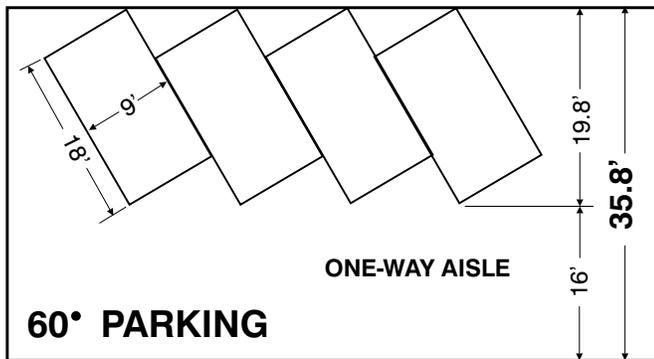

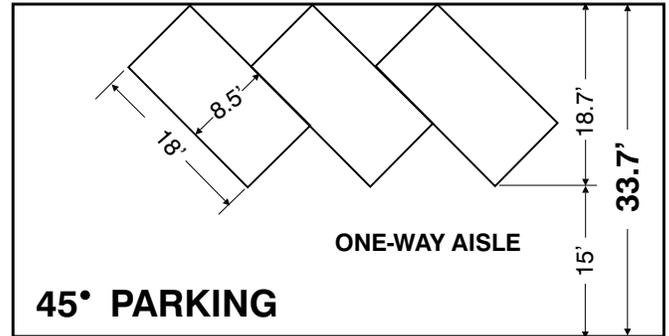

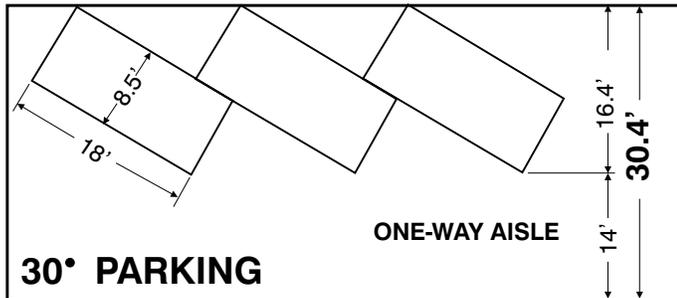

(As Per Table 20-220)

Minimum two-way aisle width: 26' ( for all angles of parking shown above)

## OFF-STREET PARKING DESIGN STANDARDS FOR FULL-SIZE CAR SPACES

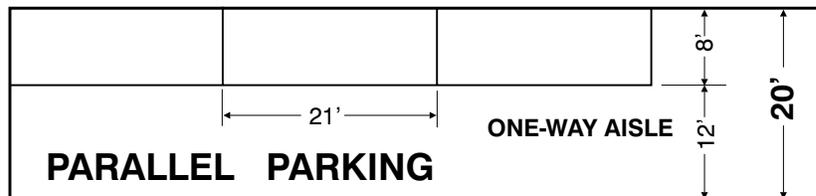

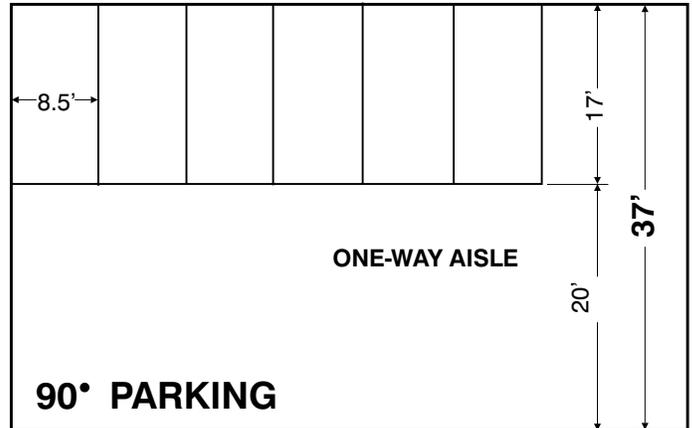

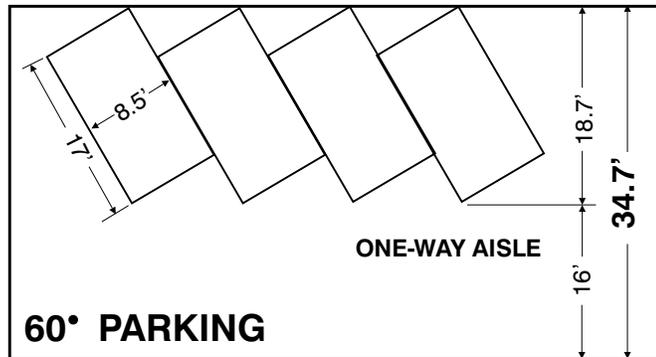

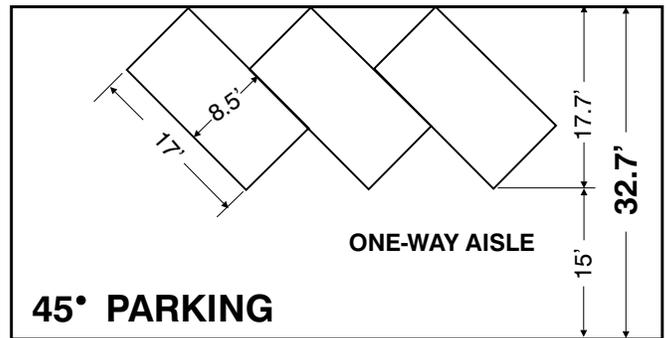

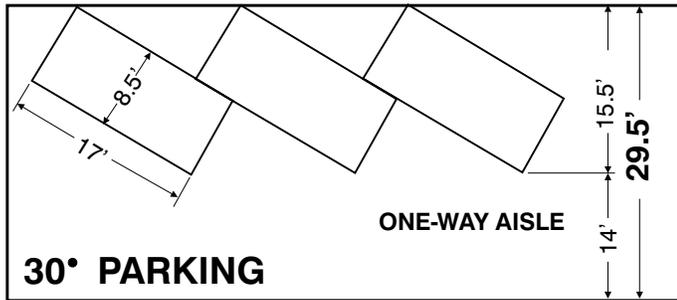

(As Per Table 20-220)

Minimum one-way aisle width: 20' ( for all angles of parking shown above)

## OFF-STREET PARKING DESIGN STANDARDS FOR UNIFORM CAR SPACES

(As Per Table 20-220)

Minimum two-way aisle width: 26' ( for all angles of parking shown above)
